

NirogScan Health Report - Dual Sample Analysis

Patient Information

Name: aditya
Age: 24
Gender: Male
Weight: N/A
Height: N/A
Notes: None

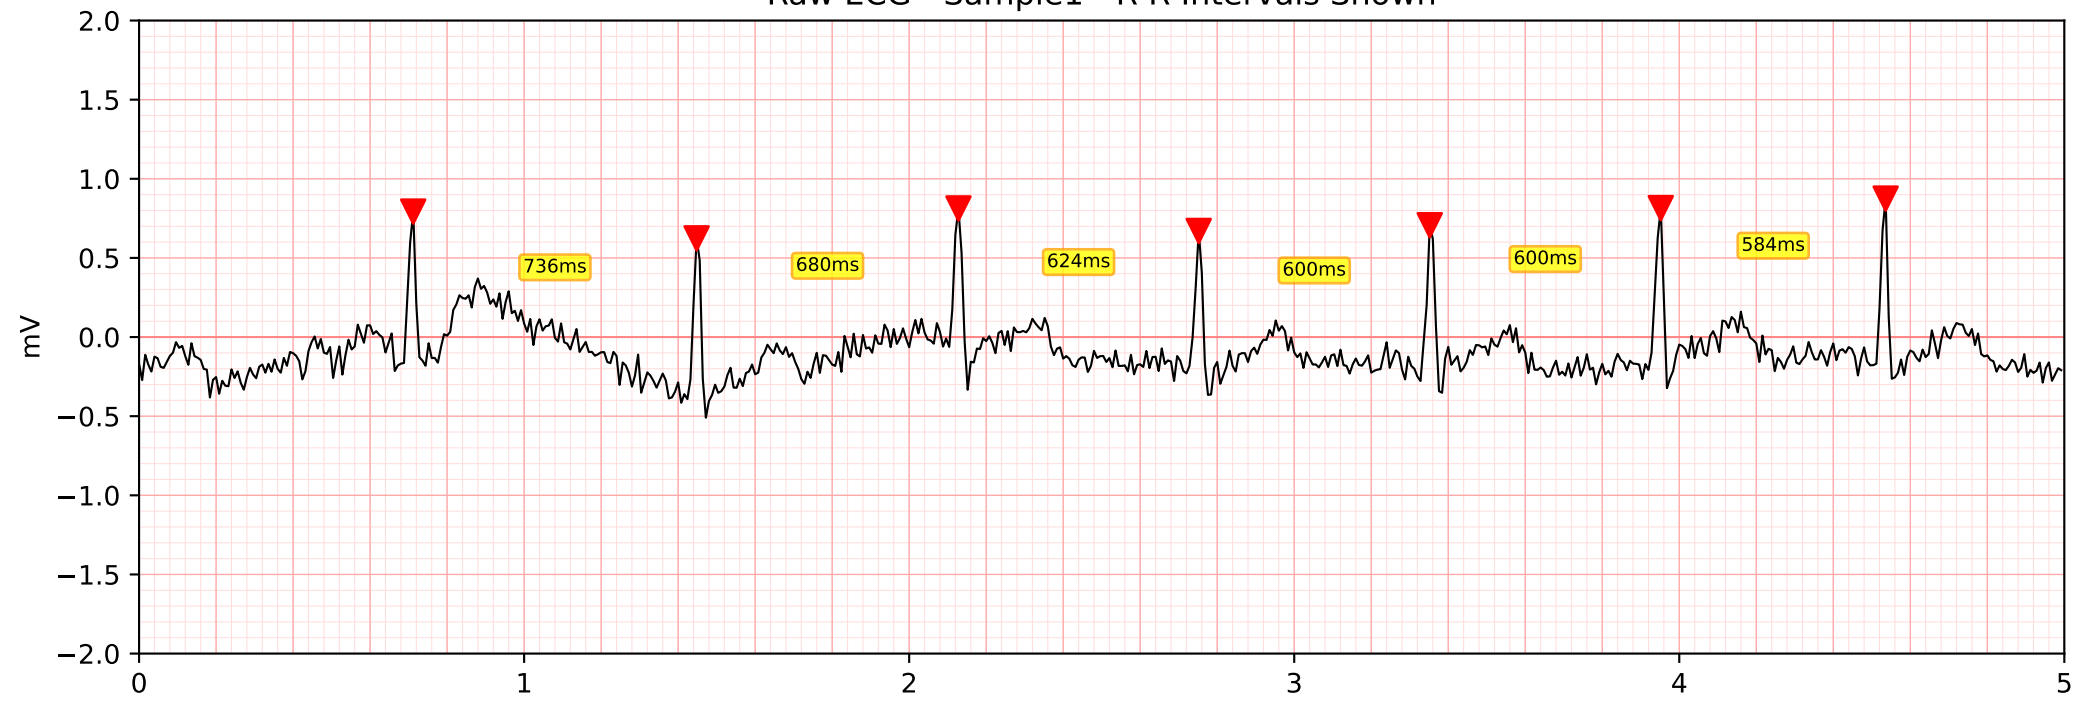

Analysis Summary

Total ECG Duration: 24.6s
ECG Sample 1: 5.0s (Best 5s Window - Basic Analysis)
Total PPG Duration: 49.2s
PPG Sample 1: Same as above (Basic Analysis)

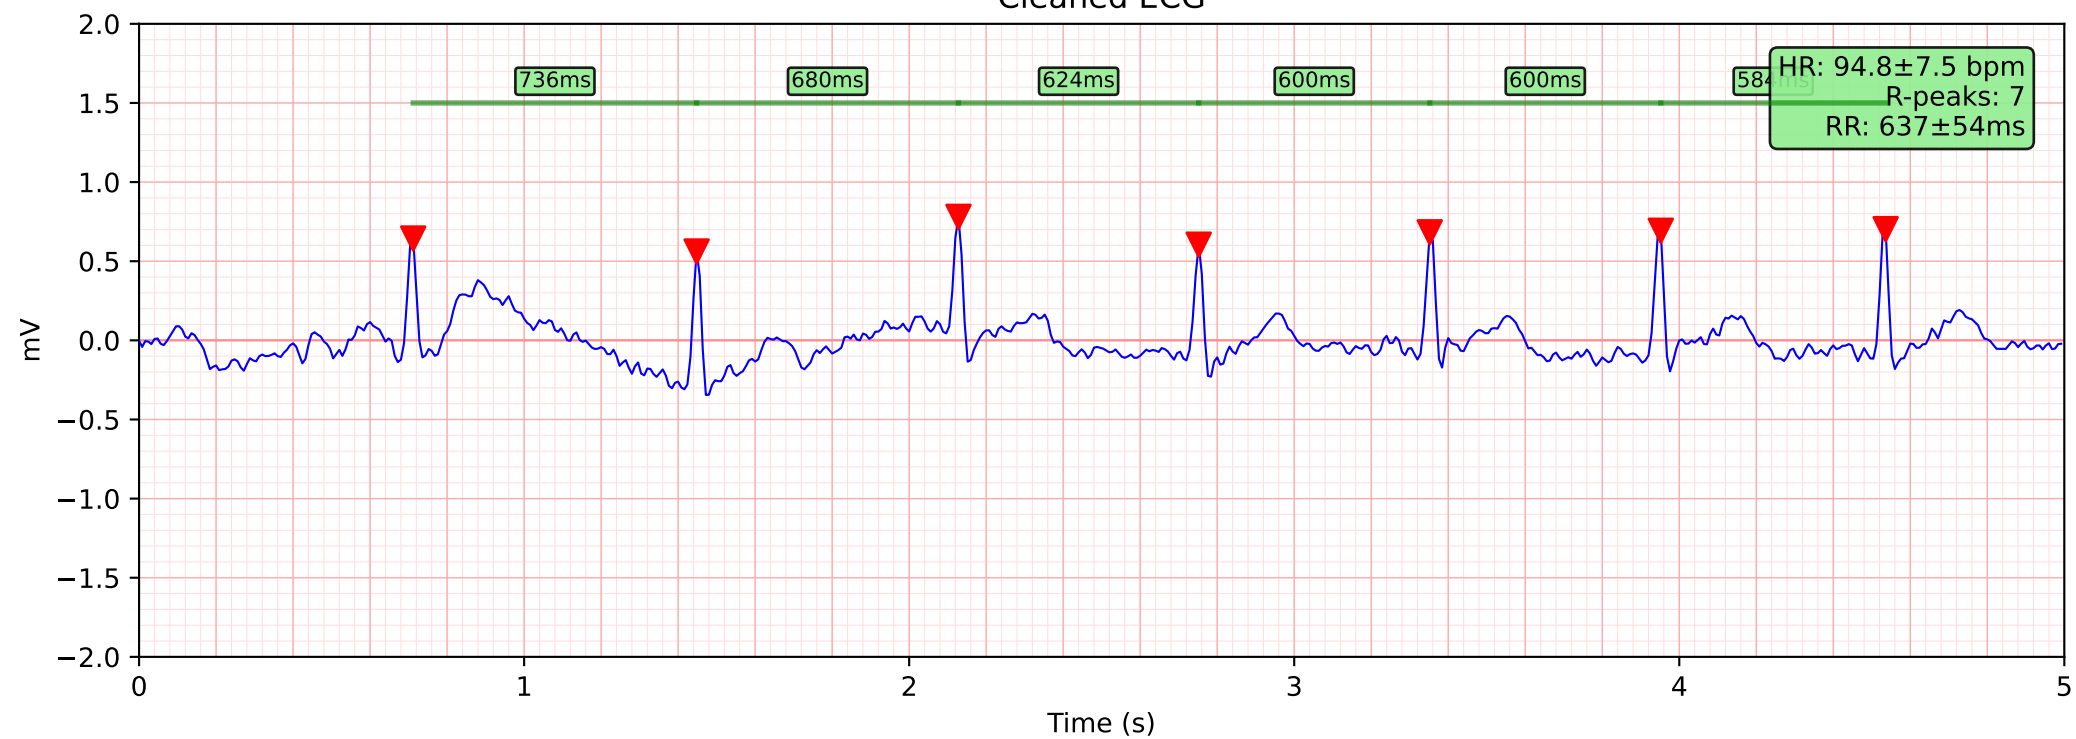

Generated: 2026-02-10 20:22:53

ECG - Sample 1: Best Quality

Raw ECG - Sample1 - R-R Intervals Shown

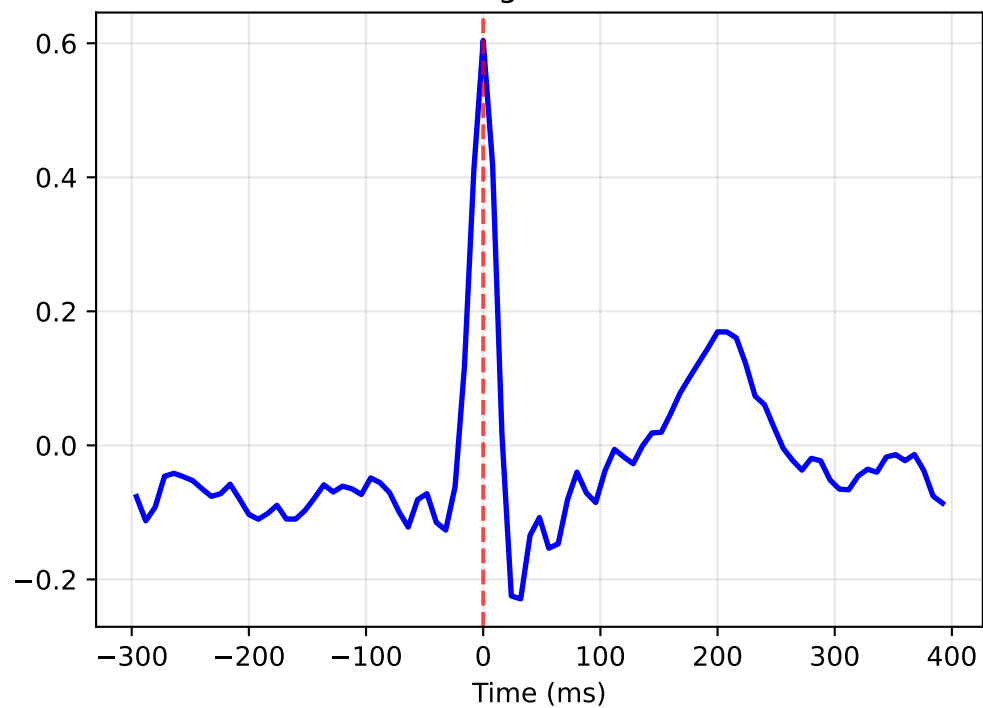

Cleaned ECG

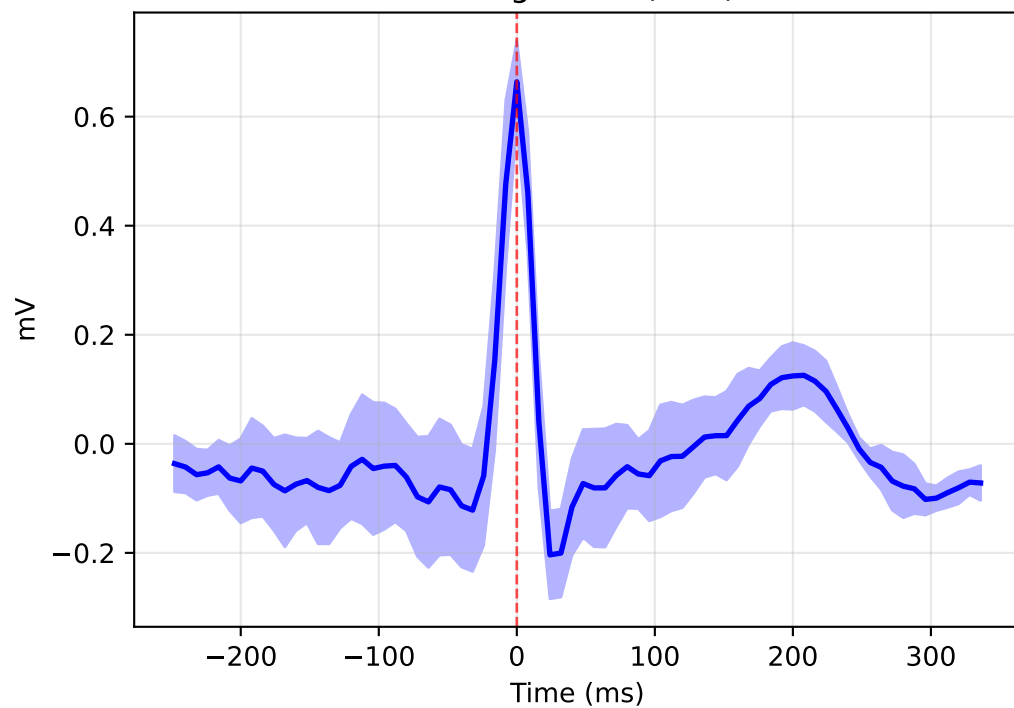

ECG Morphology - Sample1

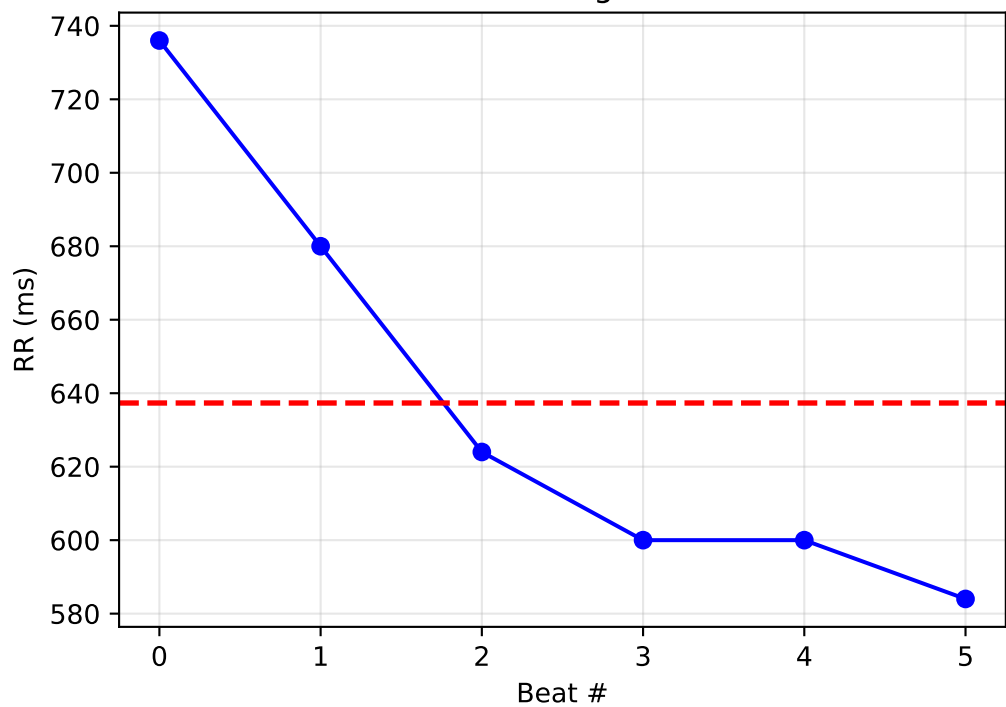

Single Beat

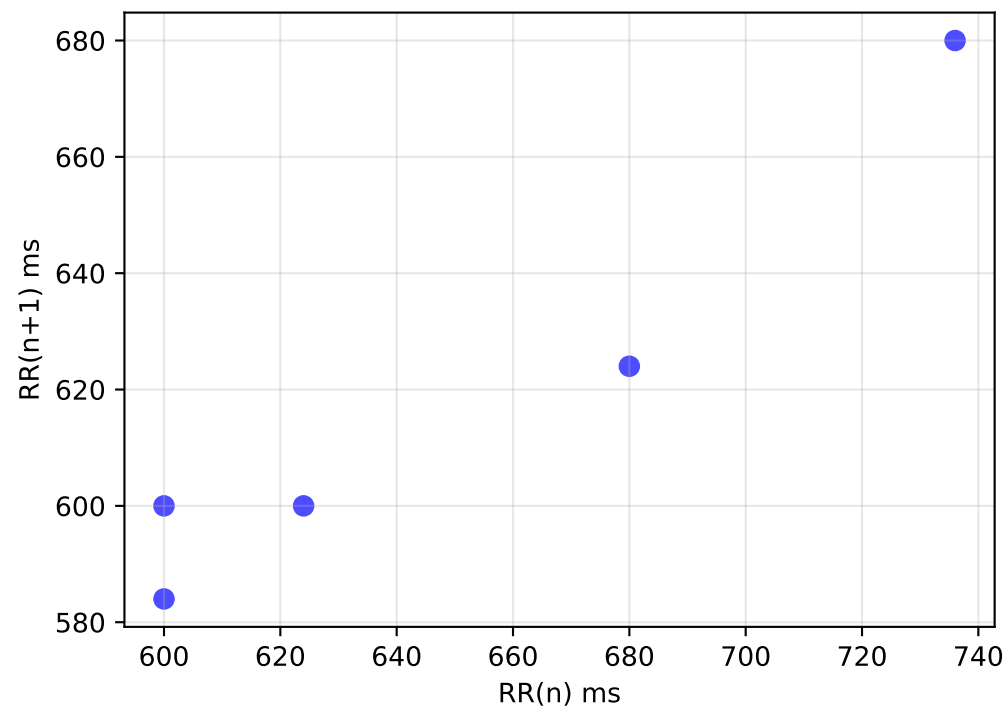

Average Beat (n=5)

RR Tachogram

Poincaré Plot

HRV Analysis - Sample1

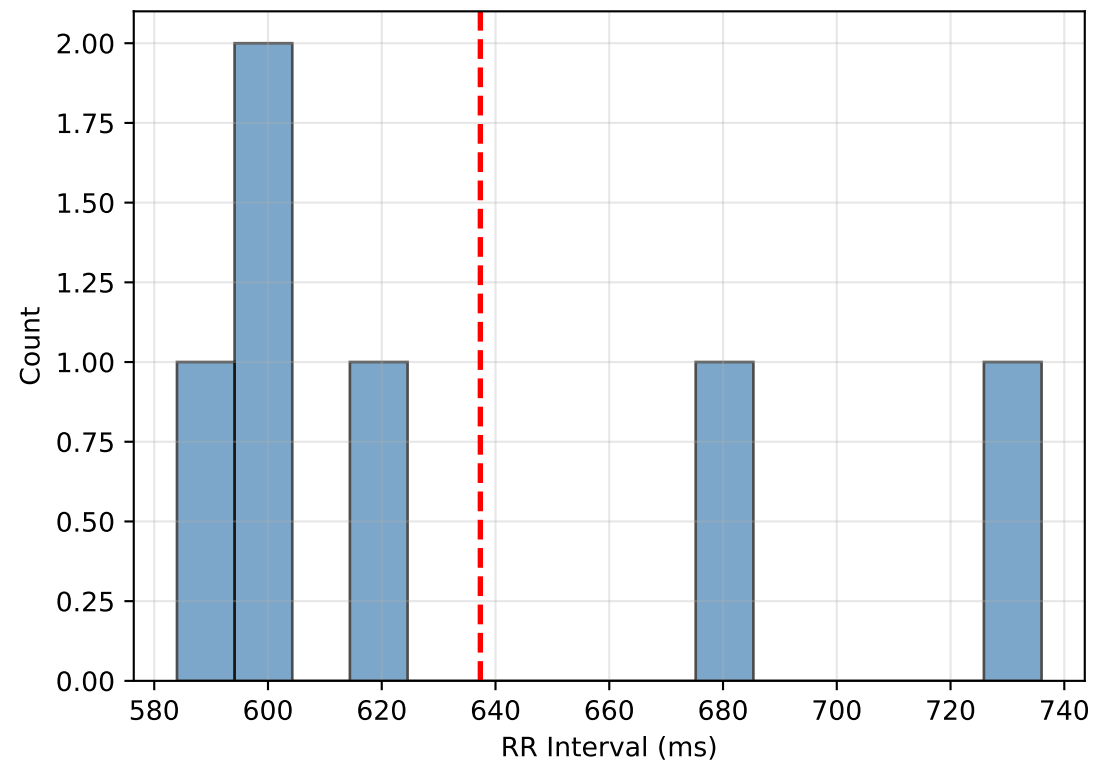

Time Domain

Average RR Interval:	637.33
Heart Rate Variability:	58.93
Short-term HRV:	37.69
Large Beat Changes %:	33.33
Median RR:	612.00

Frequency Domain

Requires 60+ seconds

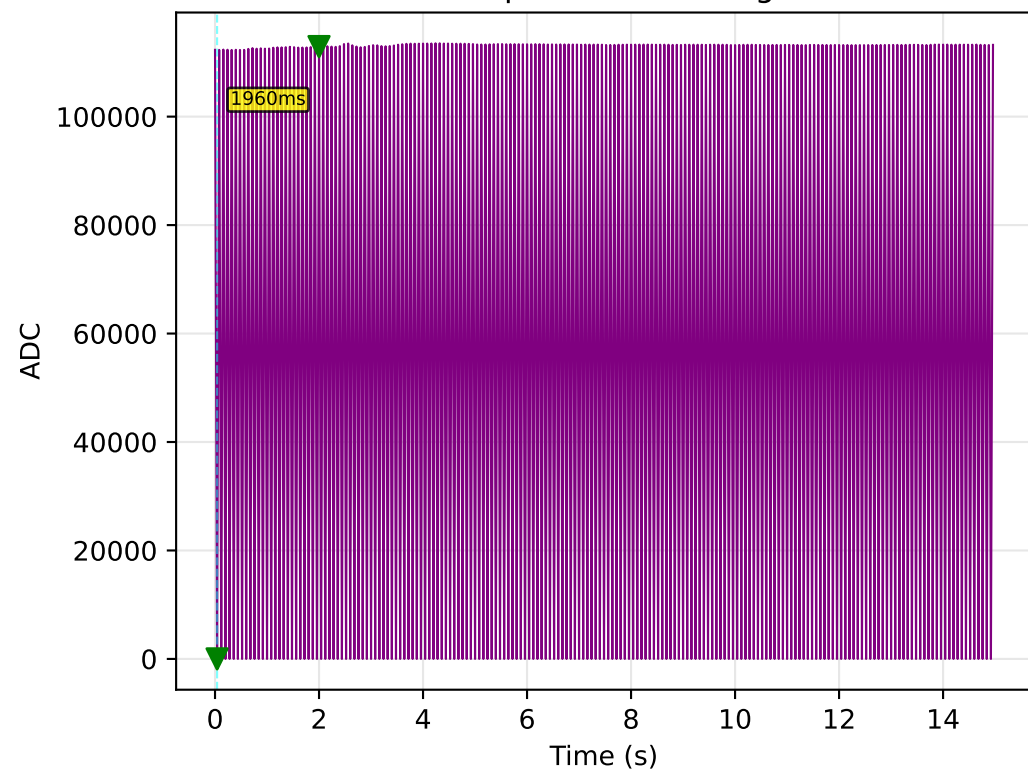

RR Distribution

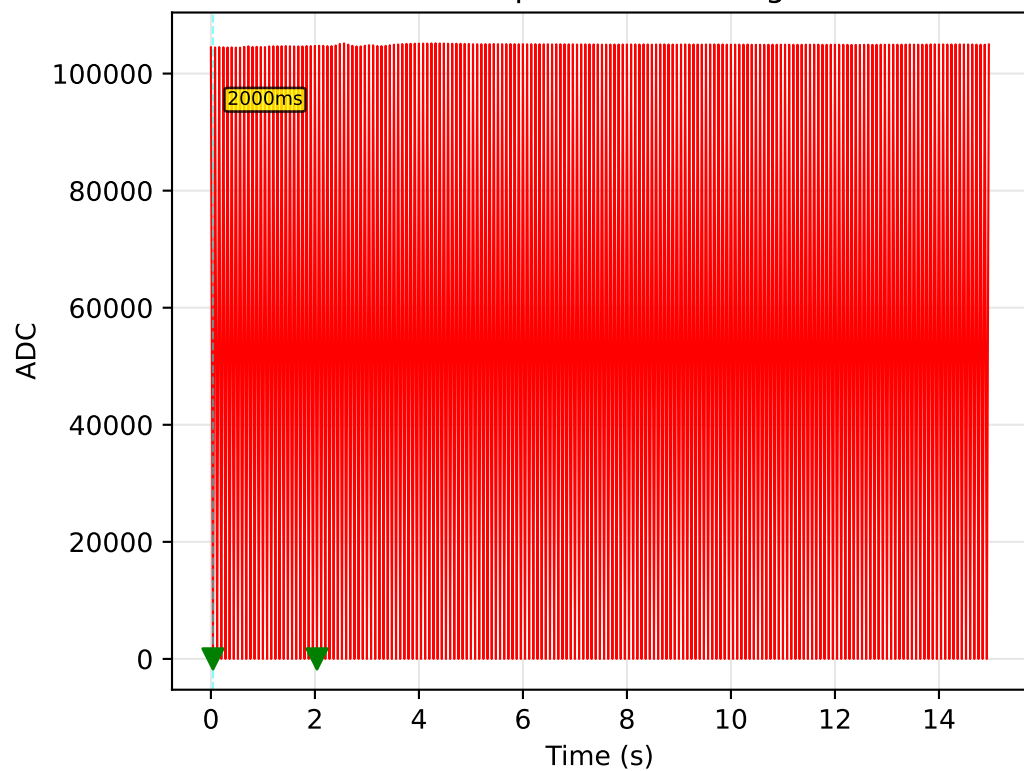

Nonlinear

PPG Signals & Beat Segmentation - Sample1

IR Channel - 3 peaks - Beat Segmentation

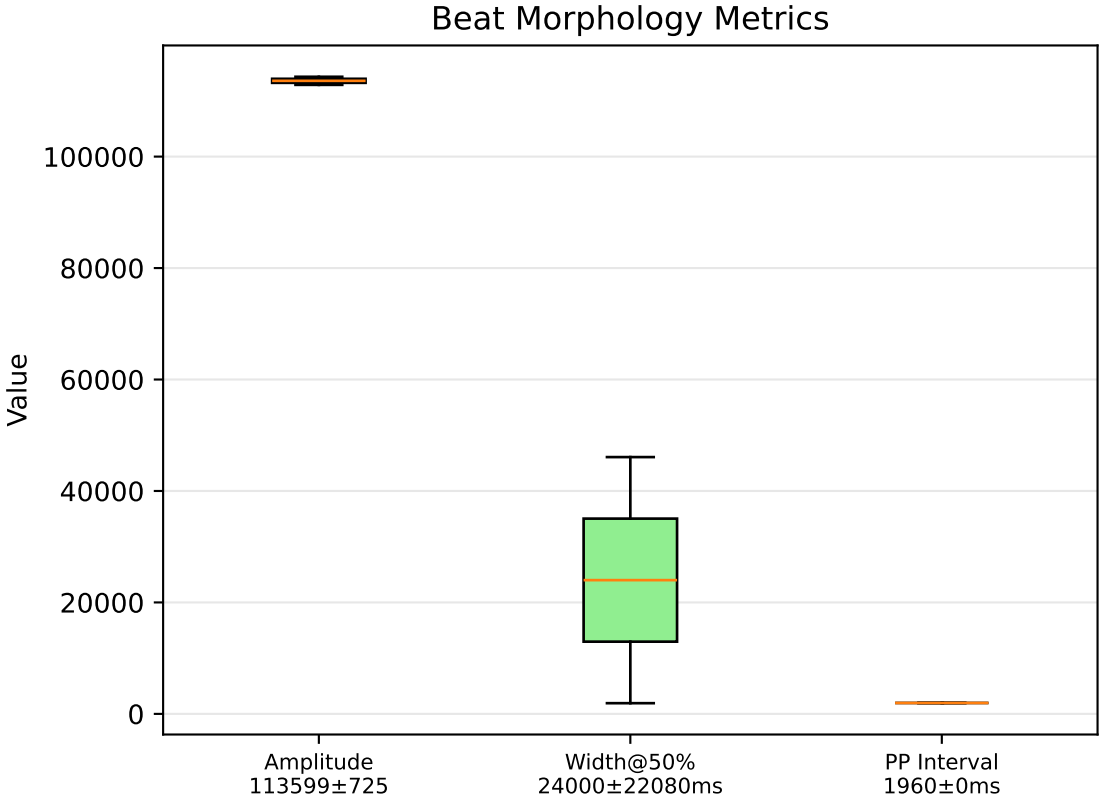

Red Channel - 3 peaks - Beat Segmentation

PPG Beat Morphology & Segmentation - Sample1

Insufficient beats

PPG Analysis - Sample1

Oxygen Saturation

81%

SpO2

Signal Quality

Perfusion Index:

202.00%

Signal Quality:

1.000

Pulse Rate:

30.6 ± 0.0 bpm

PRV Time Domain

Requires 5+ peaks

Summary - All Samples

ECG Sample 1 (Best 5s Window - Basic Analysis):

Duration:	5.0s
R-peaks:	7
Analysis Type:	Time-domain only
Heart Rate:	94.8 ± 7.5 bpm

PPG Sample 1 (Full Recording - Basic Analysis):

Duration:	49.2s
IR Peaks:	3
Analysis Type:	Time-domain only
SpO2:	81%

Understanding Your Results

- **Oxygen Saturation:**

Blood oxygen. Normal: 95-100%.

- **Heart Rate Variability:**

How much heartbeat timing varies. Higher = healthier. Normal: 50-100ms.

- **Short-term HRV:**

Beat-to-beat changes. Normal: 20-50ms.
