Understanding Your Results

(Simple explanations of each measurement)

Average RR Interval:

Average time between heartbeats. Normal: 600-1000ms.

Heart Rate Variability:

How much heartbeat timing varies. Higher = healthier heart. Normal: 50-100ms.

Short-term HRV:

Beat-to-beat changes. Reflects relaxation nervous system. Normal: 20-50ms.

Large Beat Changes %:

Percentage of beats differing >50ms. Higher = good health. Normal: 3-25%.

PR Interval:

Atrial to ventricular time. Normal: 120-200ms.

QRS Duration:

Ventricular contraction time. Normal: 80-120ms.

Corrected QT:

Heart rate adjusted QT. Normal: <440ms.
